After you've cloned the blog project repository, navigate to the project's directory using the command line. Once you're located inside the blog project, what is the very first thing you should do in a Git repository?

- ✓ run the `git status` command
- ○ open the project in a code editor
- ○ decide what new feature to work on

Use `git log` to find the commit that has a SHA that starts with `f9720a`. Who made the commit?

- ○ James Parkes
- ✓ Richard Kalehoff
- ○ Colt Steele
- ○ Julia Van Cleve
- ○ Godzilla McFiddlebrunches

There's a commit with the message "Convert social links from text to images". How many files were changed by this commit?

○ 2 files

○ 4 files

✓ 5 files

○ 9 files

By default, a Git tag will not appear in a log. What flag must be used to display the tag information in the output of `git log`?

○ --show-tags

○ --tags

○ --display-all

✓ --decorate

How about a quick quiz to see if you're following along with how merging works.

Let's say a repository has 4 branches in it:

- master
- allisons-mobile-footer-fix
- nav-updates
- jonathans-seo-changes

The changes on `master` and `allisons-mobile-footer-fix` need to be merged together. If HEAD points to `allisons-mobile-footer-fix`, which branch will move when the merge is performed?

○ master

⊘ allisons-mobile-footer-fix

○ nav-updates

○ jonathans-seo-changes
